## Burning desire to save the orangutan

Orangutans are gracing the walls of Customs House this month as part of an exhibition to expose the destruction of their natural habitat in Indonesia. The multimedia exhibition coincides with the release of *The Burning Season*, an Australian film about the deliberate lighting of fires across Indonesia which destroy pristine rainforest, endangers orangutans and contributes to climate change. *The Burning Season* will be screened at Dendy Opera Quays this Friday to link with the Customs House exhibition.
