1 Executive Summary

This Traffic and Parking Impact Assessment has been prepared in accordance with the requirements of the City of Sydney DCP & LEP 2012, the Road and Maritime Services (RMS) *'Guide to Traffic Generating Developments'* to accompany a Planning Proposal to City of Sydney Council to provide a commercial office space above the existing self-storage commercial facility.

The proposal as described in Section 4 of this report involves providing an additional two levels of office space above the existing self-storage facility, resulting in an additional 1260m² of site area.

It was determined in Sections 3.4 and 3.5 of this report that there was excellent accessibility to the site in terms of cycling, walking and public transport. Section 5.1 outlines the proposed bicycle parking spaces and related facilities which comply with the DCP rates.

As outlined in Section 5, no on-site parking for motor vehicles is proposed in accordance with the maximum rates outlined in the LEP. Furthermore, no change is proposed to the existing on-site and on-street loading facilities which will be sufficient to cater to both the requirements of the existing and proposed developments.

Given this proposal is in a relatively early stage, no detailed design of the proposed on-site bicycle parking facilities is available. These facilities are to be designed in accordance with AS2890.3-2015 and Council DCP requirements.

Considering the proximity of the site to various public transport services and cycleways as well the absence of proposed parking spaces, it is considered that the proposal would result in a negligible increase in traffic generated by the site. Overall, it's anticipated that there would be a minimal impact on the safety and operating efficiency to these roads, or their intersections.

The Traffic and Parking Impact Assessment concludes that the subject site is suitable for the redevelopment of the site in relation to the impact of traffic, vehicle access, parking and safety considerations. The development is considered to have negligible effect on the safety and operating outcome of the surrounding transport network.

2 Introduction

Barker Ryan Stewart has been engaged by Ethos Urban to prepare a Traffic and Parking Impact Assessment to accompany a Planning Proposal to provide a commercial office space above the existing commercial facility. This report is done in accordance with the requirements of the City of Sydney DCP 2012 (DCP) and LEP 2012 and the Road and Maritime Service's (RMS's) 'Guide to Traffic Generating Developments'. The proposal involves increasing the number of floors on-site from 2 to 4, resulting in an increased floor area in of 1,161m², to accommodate a commercial office above the existing self-storage warehouse.

The purpose of this report is to assess and address traffic, access, car parking and pedestrian impacts generated by the proposed development. This can be briefly outlined as follows:

- The expected traffic generation to/from the proposed development.
- The impact of the proposed development on the road network.
- Vehicle parking provisions.
- Vehicular requirements for delivery and waste collection.
- Provision for pedestrians.
- Availability of public transport.

3 Existing Conditions

3.1 Site Location

The site is located within a B4 Mixed-Use zone at 30-62 Barcom Avenue, Darlinghurst B/-/DP111138. For the purposes of the Sydney LEP 2012 Land Use Transport Integration Map it falls within land under category 'B'. Per the Public Transport Accessibility Level map the land is category 'F'.

The site is located at the intersection of Womerah Lane and Barcom Avenue, with frontage to Barcom Avenue. It's bound by existing residential development to its South, an existing car dealership to the East and an approved car dealership to the north which is currently under construction.

Figure 1: Site Location (source: NSW Land & Property Information SIX Maps 2017)

3.2 Existing Development

The site is currently developed and is occupied by an existing self-storage facility. The site has an area of 1001m² and has two driveways accessing Barcom Avenue, which service two loading bays. There is currently one on-site parking space used for loading and unloading in addition to a 20m on-street loading zone outside the frontage which is active between the hours of 8:30am – 5:30pm Monday – Friday and 8:30am – 12:30pm Saturday. Operating hours of the self-storage facility are also 8:30am – 5:30pm Monday – Friday and 8:30am – 12:30pm Saturday.

Figure 2: Aerial Photo of Site (source: NSW Land & Property Information SIX Maps 2017)

3.3 Existing Road Conditions

Barcom Avenue is a one-way, low-speed local road with ~7m width and on-street parking on both sides. Footpath has been provided on both sides of the street for pedestrians. A 40km/h speed limit has been set for the road and traffic is restricted to moving in a westerly direction only. As such vehicles seeking to access the site will need to enter Barcom Avenue via its intersections with New South Head Road or Womerah Avenue.

With regards to access to the broader Sydney road network, access to and from the site is restricted by the one-way flow on Barcom Avenue. Therefore, most of the traffic exiting the site will utilise the intersection of Barcom Avenue and Liverpool Street. Drivers will then use Boundary Street / Mclachlan Avenue to travel to the east and Liverpool Street westbound to travel to the North, West and South. Those travelling to the site will likely use the intersection of New South Head Road and Barcom Avenue for almost all circumstances except when travelling from a southwest direction.

Vehicular access to the existing site is via two vehicular crossings on Barcom Avenue.

3.4 Public Transport and Pedestrians and Cyclists

3.4.1 Public Transport Overview

The area is well serviced by public transport, with bus connections and King's Cross train station located in close proximity to the site. King's Cross station is 800m away (10 minutes' walk) and provides frequent train services to the CBD and Sydney's east and south on the T4 South Coast Line, with a frequency of ~15 minutes during off-peak times and ~8 minutes during peak times.

Similarly buses between the Sydney CBD and nearby bus stops on New South Head Road operate with a 15-minute frequency during off-peak times and a 10-minute frequency during peak hours.

3.4.2 Potential Travel Routes

To/From West and South

Commuters travelling to the site from Sydney's west and south would be able to utilise various train lines such as the T1/T2/T3/T4 lines to travel to Central Station, changing to the T4 line (if necessary) and then travelling to King's Cross before walking 10 minutes to the site.

Alternatively, if commuters wish to minimise walking they can alight from their trains at Town Hall Station before catching either the 324 or 325 buses, which would bring them within 200m of the site.

The routes can be reversed to facilitate workers' return trips.

To/From East

Commuters residing east of the site can utilise the T4 line from Bondi Junction to reach King's Cross Station or can catch buses to Central before making their way to the site.

3.4.3 Impacts

The proposed offices would result in a relatively minor increase in pedestrian traffic and public transport usage in the local area.

Overall the existing site has excellent access to pedestrian and cycling infrastructure and public transport, which can accommodate the requirements of the proposed development.

The site is also located within the established Sydney cycle network, close to several shared paths. See Appendix B for more information. Pedestrian infrastructure in the area is also consistent with the high standard generally provided throughout the Sydney CBD.

3.5 Cyclists

As shown in Appendix B the site is located on Barcom Avenue on what is classified as a 'low traffic, on-road, quiet route' by the Ausway cycle route map. The Barcom Avenue route connects to Liverpool Street which provides access to the Bourke Street 'separated off-road cycleway' which provides a safe dedicated link to both the north and south of Sydney's CBD. This major cycleway also provides off-road share paths to the east via Moore Park and west via low traffic on-road routes. These links to the west also provide access to train stations in Sydney's CBD. Therefore, the cycle network provides safe access to the site for experienced riders, riders who live locally and novice riders who can initially travel to the city CBD via public transit.

4 Proposed Development

4.1 Development Description

The proposal involves providing an additional two stories above the existing self-storage facility. This will result in an increase in gross internal area from 2,374m² to 3,535m² and a corresponding approximate increase in FSR from 2.39:1 to 3.56:1. These additional stories would be used as short-term office space. A similar proposal has been successfully operating over a year in North Sydney.

No additional on-site parking spaces are proposed however, one on-street shared car parking space will be available adjacent the site and on-site bicycle parking will be provided.

4.2 Access

Two existing vehicular accesses to the site will continue to be used for their current function servicing the self-storage facility. Bicycle and pedestrian access to the site will be facilitated by a separate entrance on Barcom Avenue.

4.3 Service Vehicles

Waste collection will take place on-street as will the loading and unloading of vehicles associated with the office building.

5 Car Parking Assessment

5.1 Parking Provision and Requirements

The proposed car parking and bicycle parking provisions have been assessed against the City of Sydney LEP 2012 parking rates contained in Clause 7.6 for Office and Business Premises in a B4 zone. For the purposes of the Sydney LEP 2012 Land Use Transport Integration Map it falls within land under category 'B'. Per the Public Transport Accessibility Level map, the land is category 'F'. A summary of these requirements and the proposed parking provisions are included in tables 2 & 3 below:

Table 1: Car parking requirements and provision

Existing Land Use	City of Sydney DCP	Existing Parking Provision
<u>Office and Business Premises</u> - A = 992.5m² Site Area - G = 2,374m² Floor Area - T = 2,374m² Floor Area of all buildings on site (Note that since the FSR will exceed 1.5:1, the rate in Clause 7.6(e) is adopted)	<u>Maximum Rates</u> $M = (G \times A) \div (50 \times T)$ Maximum rates (M) = $(2374 \times 992.5) / (50 \times 2374)$ = 19.85 (20) spaces	0 on-site parking spaces (compliant)
Proposed Land Use	City of Sydney DCP	Proposed Parking Provision
<u>Additional Office and Business Premises (3rd and 4th floors)</u> - A = 992.5m² Site Area - G = 1,161m² Floor Area - T = 3535m² Floor Area of all buildings on site (Note that since the FSR will exceed 1.5:1, the rate in Clause 7.6(e) is adopted)	<u>Maximum Rates</u> $M = (G \times A) \div (50 \times T)$ Maximum rates (M) = $(1161 \times 992.5) / (50 \times 3535)$ = 6.5 (6) spaces	0 on-site parking spaces (compliant) 1 on-street Go-get car share space

The proposal to provide no additional parking spaces is consistent with the objectives of the City of Sydney DCP Division 7 (b) "to minimise the amount of vehicular traffic generated because of proposed development". As described in Section 3.4 of this report the site is well serviced by public transport, as it is within 10 minutes' walk (800m walking distance) of King's Cross Station and is within 250m walk of bus stops on Bayswater Road and New South Head Road. This and the site's location within the inner-city region means the proposed offices are likely to attract tenants whose businesses and employees are not heavily reliant upon personal vehicles. A similar development in North Sydney, Work Inc, has been successfully operating for over a year with no on-site parking, as the demographics attracted by short-term office spaces is not heavily reliant on motor vehicles. Provision of a go-get car share space on Barcom Avenue is also proposed, providing a more sustainable alternative to private vehicle use for tenants of the proposed development and the local neighbourhood. Bicycle parking facilities to be installed on-site as outlined in the section below will provide another alternative means of transportation.

For these reasons the proposal is not anticipated to have a significant negative impact on parking in the local area.

Table 2: Bicycle parking requirements and provision

Existing Land Use	City of Sydney DCP	Existing Parking Provision
<u>Self-Storage – (Bulky Goods)</u> 2,374m ² Floor Area	<u>Minimum Rates (Employee)</u> = 1 space /600m ² GFA = $2374/600 = 3.9$ (4) spaces <u>Minimum Rates (Customer)</u> = 1 space /1000m ² GFA = $2374/1000 = 2.4$ (3) spaces	0 on-site parking spaces
Proposed Land Use	City of Sydney DCP	Proposed Parking Provision
<u>Employment Hub - Additional Office and Business Premises (3rd and 4th floors)</u> G = 1161m ² Floor Area	<u>Minimum Rates (Employee)</u> = 1 space /150m ² GFA = $1161/150 = 7.7$ (8) spaces <u>Minimum Rates (Customer)</u> = 1 space /400m ² GFA = $1161/400 = 2.9$ (3) spaces	13 on-site parking spaces (compliant)

It is proposed that 13 bike spaces will be provided to meet the requirements of the new offices set out in the Sydney DCP 2012. The facilities that contain these bikes will function as Class B and Class C facilities as described in Table 3.3 of AS2890.3-2015, with 9 spaces provided as Class B for employee use and 4 spaces provided as Class C for visitor use in accordance with Clause 3.11.3(3) of the Sydney DCP 2012. As the proposed offices are isolated from the existing self-storage facility, the proposal is unlikely to negatively impact the existing operation of the self-storage facility regarding bicycle parking. The provision of easily accessible visitor bike parking also represents an opportunity for shared use of these spaces between customers of the self-storage facility and visitors to the proposed offices.

Table 3: Bicycle parking ancillary facilities

Proposed Land Use	City of Sydney DCP	Proposed Parking Provision
<u>Employment Hub - Additional Office and Business Premises (3rd and 4th floors)</u> 9 employee spaces 4 customer spaces	<u>Minimum Rates</u> 1 bicycle locker per space x 13 = 13 lockers 2 shower and change cubicles for 11-20 bike spaces	13 lockers 2 shower and change cubicles (compliant)

These bicycle spaces and facilities are to be designed in accordance with AS2890.3-2015 and Council DCP requirements.

5.2 Loading Requirements

The City of Sydney DCP 2012 does not contain specific loading rates for a commercial development, it is proposed that the site will continue to be serviced by the existing loading space on-site and the 20m on-street loading zone.

6 Traffic Assessment

As there are no new parking spaces proposed and the site is in close proximity of the site to significant public transport facilities such as King's Cross station and buses on Williams Street/New South Head Road as outlined in Section 3.4, there is not expected to be any significant traffic generation. A minor increase in delivery vehicles and couriers attending the site is anticipated which is unlikely to pose any major impact to the surrounding road network.

7 Conclusion

This Traffic and Parking Impact Assessment has been prepared in accordance with the requirements of the City of Sydney DCP 2012, the Road and Maritime Services (RMS) *'Guide to Traffic Generating Developments'* to accompany a Planning Proposal to City of Sydney Council to provide a commercial office space above the existing commercial facility at 30-62 Barcom Avenue, Darlinghurst.

The proposed bicycle parking and vehicle loading facilities are in accordance with the City of Sydney DCP 2012 rates. The proposal to provide no dedicated motor vehicle parking spaces is also in accordance with the DCP and LEP and is consistent with similar developments near the Sydney CBD.

It is considered that the increase in traffic generated by the proposal, predominantly related to loading services and visitors, would have a minimal impact on the safety and operating efficiency of the surrounding road network.

The Traffic and Parking Impact Assessment concludes that the subject site is suitable for the proposed changes to the existing use of the site in relation to the impact of traffic, vehicle access, parking and safety considerations. The development is considered to have negligible effect on the safety and operating outcome of the surrounding transport network.

Appendix A

Public Transport Information

How to use this timetable

This timetable provides a snap shot of service information in 24-hour time (e.g. 5am = 05:00, 5pm = 17:00). Information contained in this timetable is subject to change without notice. Please note that timetables do not include minor stops, additional trips for special events, short term changes, holiday timetable changes, real-time information or any disruption alerts.

For the most up-to-date times, use the Trip Planner or Departures on **transportnsw.info**

Real-time planning

You can plan your trip with real-time information using the Trip Planner or Departures on **transportnsw.info** or by downloading travel apps on your smartphone or tablet.

The Trip Planner, Departures and travel apps offer various features:

- favourite your regular trips
- see where your service is on the route
- get estimated pick up and arrival times
- receive service updates
- find nearby stations, stops, wharves and routes
- check accessibility information

Find the latest apps at **transportnsw.info/apps**

Accessible services

All new buses are wheelchair-accessible with low-level floors and space for wheelchairs, prams or strollers. Look for the  symbol in this timetable. Some older buses may not have all the features you need. There will be more accessible services as older buses are replaced.

Who is providing my bus services?

The bus services shown in this timetable are run by State Transit.

Fares

To travel on public transport in Sydney and surrounding regions, an Opal card is the cheapest and easiest ticket option.

An Opal card is a smartcard you keep and reuse. You put credit onto the card then tap on and tap off to pay your fares throughout Sydney, the Blue Mountains, Central Coast, Southern Highlands, Hunter and the South Coast.

Fares are based on:

- the type of Opal card you use
- the distance you travel from tap on to tap off
- the mode of transport you choose
- any Opal benefits such as discounts and capped fares that apply

Find out more about Opal fares and benefits at **transportnsw.info/opal**

Which Opal card is right for you?

Adult - For customers 16 years and over who are not entitled to any concessions.

Child/Youth - For children aged 4-15 and eligible secondary students.

Gold Senior/Pensioner - For eligible NSW and interstate seniors, pensioners, war widows/ers and asylum seekers.

Concession - For eligible tertiary students, job seekers, apprentices and trainees.

How to get an Opal card

You can get an Adult and Child/Youth Opal cards over the counter at thousands of Opal retailers that display the Opal sign . To find your nearest retailer or order online, visit **transportnsw.info/opal**.

If you are eligible to travel with concession fares you can apply for a Gold Senior/Pensioner or Concession Opal card. Visit **transportnsw.info/opal** or call **13 67 25 (13 OPAL)** for more information.
