

## Background

Over the next 10 years, we're upgrading more than 60 parks across the City of Sydney, from small pocket parks through to larger local parks.

As part of this round of parks we are upgrading McKee Street Reserve and invite your feedback on the proposed concept design.

The work is a whole park upgrade including a new community garden, new lawn area, upgraded lighting, new entry from Wattle Lane, new planting, seating and a new playground to replace the non-compliant equipment.
