27. Narrative and Identity Construction in the Pacific Islands, edited by Farzana Gounder, John Benjamin's Publishing Company, 2015.

"Comprising of more than twenty five percent of the world's known languages, the Pacific is considered to be the most linguistically diverse region in the world. What unifies the region is the culture of storytelling, which provides a fundamental means for perpetuating cultural knowledge across generations. The volume brings together linguists, literary theorists, anthropologists and historians to explore the Pacific peoples' constructions of identities through narrative". 28. Current Issues in Transitional Justice: Towards a More Holistic Approach, Natalia Szablewska, Sascha-Dominik Bachmann, Springer

International Publishing, 2014. "This volume is an inter-disciplinary scholarly resource bringing together contributions from writers, experienced academics and practitioners working in fields such as human rights, humanitarian law, public policy, psychology, cultural and peace studies, and earth jurisprudence. This collection of essays presents the most up to date knowledge and status of the field of transitional justice, and also highlights the emerging debates in this area, which are often overseen and underdeveloped in the literature".
