

Notes:

- 1. Minimum size of concrete 460mm deep by 380mm square and enlarged at the bottom. Where solid rock is met the depth may be varied.
- 2. In localities where the ground is unstable the dimensions must be increased.
- 3. The stainless steel pin is to protrude 50mm above the surface of the concrete block.
- 4. The buffer course is to be a 50mm layer of crushed brick, gravel or coarse sand.

SECTION 1:10

NOTE: ALL DIMENSIONS IN MILLIMETRES UNLESS OTHERWISE STATED
