

Food scraps recycling service

Information for building managers and champions!

We need your help to ensure the food scraps recycling service works well in your building. You can:

- Install the signs supplied by the City above the maroon lid food scraps recycling bins
- Keep the bin lid fully closed when not in use
- Advise residents to use compostable bags or newspaper to line kitchen caddies
- Ensure all building staff and cleaners know about the food scraps recycling service and your collection days
- Put the maroon lid bins out for every collection on the scheduled collection days even if the bins aren't full
- Keep the maroon lid bins clean – rinse them out after every collection
- Let residents know their food scraps can get turned into useful resources like compost, animal feed and green energy.

The City of Sydney thanks you for being a food scraps champion!
