TACTILE/BRAILLE SIGNAGE
Tactile/Braille Signage:
To be located in a standard position.
To be placed on the right-hand side of the pole as the reader faces the kerb.
The centre of the sign is to be level with the centre of the audio-tactile pedestrian call button.
The Tactile Indicator Street signs have been developed in 4 different lengths (S, M, L, XL) to suit street name content and with 3 different aluminium cast shapes to suit a variety of smart poles and RMS poles.

Refer to *Tactile/Braille Signage - Construction Drawings* (Appendix 2) for full details and specifications.

Artwork templates for all 4 length variations are available.

**Size**

64mm x variable lengths (S, M, L, XL)

**Colours**

White on Bronze background to match Dulux Precious Metropolis Bronze Pearl Satin 971-59003

**Braille**

Must be Grade 1 Braille (uncontracted) in accordance with the criteria set out by the Australian Braille Authority.

Only standard contractions eg (ST. / RD.)

Left justified

**Text**

Arial

Sentence case

Cap height 20mm

Tracking 14

Embossing between 1mm & 1.5 mm high

AUDIO TACTILE BUTTON & EXISTING RUBBER TACTILE SIGN
The following messaging rules have been developed during the pilot project and documentation phase:

General messaging

The Tactile indicator is to show the street name on which the sign is located, followed by the property numbers directly behind the reader/sign and the letter L or R, indicating whether the shown property numbers are to the left or right of the reader.

A QR code may be added in the future to give additional audio information.

Abbreviations

Only the following abbreviations are to be used on Tactile Indicator signs:

- Street: St
- Road: Rd
- Lane: Ln
- Avenue: Ave
- Crescent: Cres

Traffic Islands

Only street names (no property numbers) are to be shown on tactile indicators located on traffic islands.

Unclear Property numbers

In situations where property numbers are unclear only the street name is to be shown.

Significant destinations

In situations where property numbers are available, but a significant destination is located behind the reader, the street name followed by the significant destination is to be shown, e.g. Druitt St Town Hall, George St QVB, etc. This rule applies also to all locations around parks, e.g. Elizabeth St Hyde Park.

Martin Place

All poles at street intersections of Martin Place are to be signed with the street name and Martin Place, e.g. George St Martin Place. The next signs along the street intersecting with Martin Place should be signed with the street name and the property numbers up to Martin Place only.
TAXI SIGNAGE
1. General

Refer to Wayfinding Signage Pylon and Taxi Rank Pylon - Construction Drawings (Appendix 1) for all construction details, including footing, structural frame, external frame and graphic panels.
