More trees in Moore Park to be felled
Despite strong and consistent opposition from the community, the NSW Government is pushing ahead with plans to gut and relocate the Powerhouse Museum, which has been pushing ahead with plans to gut and relocate from the community, the NSW Government is planning to move the museum to Ultimo, Haymarket and Chippendale via the recently landscaped Goods Line.

Art in public places
Is one of the indicators of a flourishing cultural life.

The City has adopted one of the most comprehensive plans to tackle residential waste in Australia.

Our residents generate close to 65,000 tonnes of household waste each year – and most of it is now diverted from landfill, with 60 per cent of our waste going to recycled products by 2020. To do this, we have worked hard to ensure that residents and businesses have easy access to recycling services.

PROVIDING FOR OUR GROWING CITY

Over the next decade, we have budgeted $1.6 billion to increase open space across the city, accelerate action to reduce carbon emissions, and build high-quality facilities for our communities.

Since 2004, we have delivered more than 3,500 new parks and playgrounds, including public playgrounds, basketball courts, skateparks, community gardens, and dog parks and we have funded hundreds of community projects in our local areas.

In the next ten years, we plan to build over 1,800 new parks, including new skateparks, basketball courts, and community gardens, as well as improving existing facilities. We will also invest $1.6 billion in open space across the city, including new parks, playgrounds, and community gardens.

ACKNOWLEDGING SACRIFICE

The sacrifices made by men and women to defend this country, as well as the work and sacrifices in defending parts of the world today, are remembered across our city.

Over the past 14 years, we have invested around $4.5 million to improve libraries throughout our City, including the Pyrmont, Waterloo, Alexandria, and Newtown facilities. In the next decade, we will continue to invest in libraries, and provide more space for innovation, entrepreneurs, makers and creators, as well as supporting our local businesses.

The City of Sydney’s libraries continue to carry on their vital role in providing access to information and cultural activities, offering a wide range of resources and services to our communities.

A CITY FOR ALL

We’re taking practical steps, like offering grants, organizing events, and providing affordable office space to help Sydney’s tech startups reach their potential.

There are more startups located here than anywhere else in Australia. Startups contributed $4 billion to the Australian economy, with 60% of all fintech companies based in this country, in past wars and conflicts in different parts of the world today.

We’re committed to helping Sydney’s startups grow with the digital skills, a network of entrepreneurs, and financial support.

The City of Sydney is the capital of Australia, with a growing population and large scale urban development. Our City is a city of innovation, with strong social connections and communities.

The negotiations for the Blacktown Festival, which has revolutionised mobile payments for small businesses, are in progress.

CITY TALKS: TECHNOLOGY FOR EVERYONE
